

Kissinger Hu

Senior UI/UX Designer

Sydney, NSW • 0415 056 842 • huweina98@gmail.com • linkedin.com/in/kissingerhu • kissingerhu.com

Professional Summary

Senior UI/UX Designer with 5+ years of experience setting design direction for complex enterprise, member-service and fintech products. Most recently acted as the sole designer across Surf Life Saving Australia's national platforms, supporting an ecosystem of 200,000+ members across 316 clubs. Known for modernising legacy systems, influencing product decisions and turning operational, data and compliance complexity into scalable experiences. Uses AI-assisted workflows to accelerate research synthesis, design exploration and rapid prototyping without compromising design judgement.

Core Skills

UX strategy and design leadership • Enterprise platform modernisation • Product and interaction strategy • Complex workflow optimisation • Data-heavy UX • Design systems and governance • Co-design and senior stakeholder facilitation • WCAG-informed accessibility • AI-assisted research synthesis, ideation and rapid prototyping • Responsive web and mobile products • Figma • Design-to-development collaboration

Professional Experience

Surf Life Saving Australia (SLSA) — UI/UX Designer | May 2023–May 2026 | Sydney

Acted as design lead and sole designer across multiple national platforms, setting experience direction and aligning 1–2 BAs, an architect, 7–9 developers, 2 QA specialists and senior stakeholders around complex product decisions.

SLS Hub — National Member Portal | Live since 2024

- Designed the portal replacing Members Area, unifying access to memberships, awards, patrols, submissions, resources and administration across desktop, mobile, light and dark themes.
- Ran near-monthly reviews with module users, converting direct feedback into clearer journeys, prototypes and production-ready UI.

SurfGuard — Core System Rewrite

- Replaced dense single-page tables and small-text legacy screens with structured workflows, clearer data hierarchy, stronger search/filtering and more capable table interactions.
- Created a Figma design system of 50+ reusable standard and custom components/patterns, including approximately four components tailored to SLSA workflows.
- Reduced user errors, workflow steps and task completion time while preserving permissions, business rules, edge cases and data integrity.

Member Join & Registration

- Re-architected the complete compliance-heavy join journey across adult, junior, guardian, declaration, fee and payment scenarios, using progressive disclosure and rule-driven defaults to reduce cognitive load.

SurfCom ICEMS — Emergency and Incident Management

- Improved time-critical notification and incident communication workflows where clarity, reliability and rapid action were essential.

Life Byte System — UI/UX Designer | Jan 2023–May 2023 | Sydney

HubX — B2B Fintech Trading and Risk Platform | Launched

- Independently designed complex forms, data-ingestion workflows, dashboards, charts and high-density data views for fund managers and clients.
- Established scalable UI conventions, delivered implementation-ready prototypes and supported engineering QA through launch; functionality was later incorporated into a successor platform.

Async Working — UI/UX Designer | Apr 2022–Jan 2023 | Melbourne

CourtCanva — Client Sports-Court Design and Ordering Platform

- Independently owned requirements, user flows, visual design, prototyping and handoff for court configuration, design exploration, quoting and purchase journeys.
- Defined the visual treatment for configurable courts and upgraded the wider product style to create a more coherent customer experience.
- Worked directly with BAs and developers to resolve interaction decisions and implementation constraints while the live client project progressed toward delivery.

Freelance — UI/UX Designer, Client Projects | Jun 2021–Apr 2022 | Sydney

- NOOTEE: Independently led the end-to-end design of a client-commissioned note-taking app, translating the initial product concept into journeys, information architecture, collaboration features and high-fidelity prototypes.
- Used surveys, interviews and iterative concept reviews to shape the experience and test the product direction before development.
- JR Food Court: Designed an internal mobile-first lunch ordering and table-booking app, simplifying staff ordering through focused task flows, navigation, UI, iconography and visual assets.

Education

Master of International Business — The University of Sydney | 2022–2023

Bachelor of Applied Finance and Accounting — Australian National Institute of Management and Commerce | 2019–2021
